

**Important**

1. When you receive your mirror, please check that the type/size is correct and free and freight damage.
2. Advise your supplier of Newline products of any fault within 12 hours of receiving goods.
3. Any installation of incorrect or damaged product will invalidate later claims.
4. If planning to wire the mirror to an existing electrical connection, product must be installed by a qualified electrician.

## BEFORE YOU START

1. Prior to drilling into a wall, ensure that it is clear from electrical wires and water pipes.
2. Ensure electrical connections are turned off before installation or maintenance.
3. Product is intended for indoor use only.
4. Always stand mirror glass up after unpacking the components and use soft packing where in contact with hard surfaces. Take care not to strike an edge or corner on a hard surface.
5. If hard wiring, the installation of the heated mirror must be performed by a registered electrician and installation is to comply with AS/NZS 6035. If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

## HEALTH AND SAFETY

Wear protective gloves and eye protection.

## WARRANTY

- This covers product defect for 5 years. Refer to **newline.nz** for details.
- Breakage/damage on site is not covered under warranty.
- The bathroom must provide active ventilation that meets NZ Building Code - clause.
- Installation must conform to these instructions for the warranty to apply.

## MIRRORS OVER VANITIES

It is required that the minimum gap the mirror is positioned above the vanity top is 16mm. This is to provide for ventilation at the back of the mirror and protect against a build of moisture at the base.

## TOOLS AND MATERIALS REQUIRED
